

Towards an Applied Science of Research:
Thinking More Deeply about

The Nature and Nurture of Research

Tuesday, Oct. 24, 2017 • 12:30 pm • Education 212

Jeffrey Y. Tsao, PhD

Sandia National Laboratories

If research is to thrive, it must be nurtured; but if research is to be nurtured, its nature must be understood. In this talk, we discuss progress on a “reflexive” research agenda whose long-term goal is an understanding of the nature of research that is *actionable*.

Presented by the School of Science as part of its Colloquium Series and co-sponsored by the Department of Physics.
